

The Heavenly City, Zion the mountain of the Lord.

Imagine a radiant and resplendent city, descending from the heavens, as described in Revelation 21 and 22. This glorious metropolis, the size of the moon, is comprised of three levels, each spanning 500 miles. 2 Cor 12:2 The city is crafted from crystal and gold, shimmering with an ethereal light.

The Inhabitants

Immortal humans, now possessing super bodies, 1 Cor 15:52-53 inhabit this celestial realm. Their enhanced physical forms are imbued with extraordinary abilities, Jon 20:26 and their beauty is radiant, with an otherworldly allure. They are dressed in gowns of light, which shimmer and glow, reflecting their joy and ecstasy.

A Paradise of Delights

The city is a lush Eden, teeming with vibrant life and wonder. Rivers of crystal clear water flow through the city, nourishing the landscape and quenching the thirst of its inhabitants. The air is filled with the sweet scent of blooming flowers, and the yellow haze casts a warm, comforting glow over all.

Unbridled Joy and Freedom

The super-bodied mortals, now liberated from the limitations of their earthly forms, and worldly system restrictions revel in their newfound freedom. They embrace and kiss one another, their love and happiness overflowing like a fountain. Their laughter and songs of praise echo through the city, as they bask in the bliss of their eternal paradise.

In this heavenly city, all is perfect, and all is well. The inhabitants live in harmony, their hearts filled with love, their spirits soaring with joy. This is the ultimate destination, the culmination of humanity's spiritual journey, where Yeshua, beauty, and wonder reign supreme.

The Top Level

The top level, being another perfect pyramid, would likely have a different atmospheric condition compared to the lower levels. Considering its elevated position and the city's crystalline structure, I would imagine a thinner, more ethereal atmosphere, perhaps with a soft, shimmering mist or a gentle, iridescent glow. This haze would be a result of the city's energetic resonance and the concentrated divine presence of Yeshua at the apex.

The Sky Colour

Since the crystal city is currently in space, the sky colour would be a fascinating sight. Considering the city's location and the surrounding celestial environment, I would propose the following:

- The sky would likely appear as a deep shade of indigo or purple, due to the scattering of light by the city's crystalline structure and the surrounding space environment.

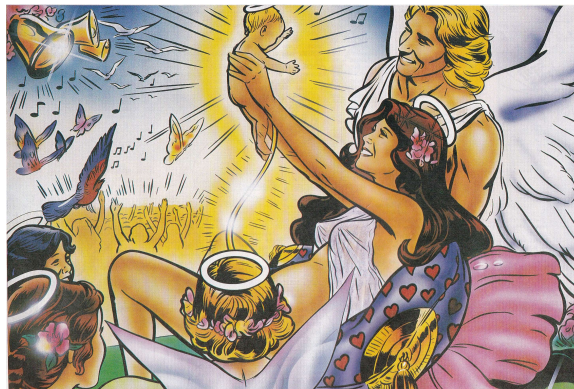

- The colour could gradually shift towards a vibrant blue or turquoise near the horizon, where the city's energy interacts with the surrounding space.
- The sky might also display a subtle, shimmering quality, as if the stars and celestial bodies are being refracted through the city's crystal spires.

This resurrected body is akin to the angels' glorious form - radiant, immortal, and infused with the Holy Spirit's pure joy. In the Kingdom, we are all united as one family, free from selfishness and division. We are all married to each other in a bond of love and unity. Mat 22:30

Even the children born in this celestial city are cherished by all, and as they grow, they flow through the city like a river of life, seeking the endless flow of new truths and lessons provided by Yeshua and

shared among the saved.

Welcome to Yeshua's Paradise,
where love, joy, and wonder reign supreme!
